
Podcast Stopped validating!

Posted by brilliants - 2010/01/11 01:18

Hi,
My feed stopped working with Feedburner 3 days ago for some reason. It seems it suddenly doesn't validate (See here - http://feedvalidator.org/check.cgi?url=http%3A%2F%2Fwww.sinai.org.il%2Findex.php%3Foption%3Dcom_podcast%26view%3Dfeed%26format%3Draw).
I didn't change any thing in the podcasts, so I can't understand why this should happen.

=====

Did you add any other plugins to your Joomla installation recently? It looks like JavaScript for 'avreloaded' is showing up in your feed.
