## Flash player not playing nice!

Posted by normdouglas - 2010/02/01 20:06

---

Hi, I've just migrated a site from J1.0 to J1.5... all going well, have used the PodCast Suite previous in the old site.

Everything appears correct, except the flash player is not finding the mp3 files... even though the path is correct.

Any help appreciated.

URL = <http://www.barraboolhills.com.au/new/Sermons/>

cheers

Thanks for using the suite! From what I can see, the URLs to MP3s in your feed look like this:

[http://www.barraboolhills.com.au/podcasts/100207\\_PM\\_Graham\\_Clarke\\_Love.mp3](http://www.barraboolhills.com.au/podcasts/100207_PM_Graham_Clarke_Love.mp3)

...while your URLs in the embedded players look like this:

[http://www.barraboolhills.com.au/new/podcasts/100207\\_PM\\_Graham\\_Clarke\\_Love.mp3](http://www.barraboolhills.com.au/new/podcasts/100207_PM_Graham_Clarke_Love.mp3)

So it looks like you have an extra folder in your path.
