
rss feed page does not show properly

Posted by ic3ss - 2010/02/12 06:24

I have a site on joomla 1.15.15 and I just installed the podcast package. The component is working, my icon is there to subscribe to my podcast. When clicked it brings up this page:

http://gatewayfoursquare.com/index.php?option=com_podcast&view=feed&format=raw

It has a link to download the mp3 file, but no option to subscribe to the podcast. The header of the page does not have the pink box that tells you that you are seeing a page with frequently updated content.

Not sure how to proceed, thanks for any help.

Hello Wayne,

Thanks for using the suite! It looks like you now have a link for subscribing in iTunes, so you can get rid of the other link that points directly to the feed.
